

MicroStrategy - Best in Business Intelligence.

Since 1989, MicroStrategy has provided integrated reporting, analysis, and monitoring software that helps leading organizations worldwide make better business decisions every day. Now, we are the fastest growing independent BI Company in the market providing a unique custom made solution. Within 12 months all our employees are currently undertaking exciting projects either within Warsaw or Globally. The demand for our solutions means that we need to significantly expand our operation!

We are looking for professionals, graduates or last year's students to join our growing Consulting Team.

Business Intelligence Associate Consultant

We want you to:

- Possess analytical skills, excellent communication and presentation skills
- Be interested in IT/Business and willing to grow professionally in the field of Business Intelligence
- Speak fluent English (our internal language at MicroStrategy), another foreign language is taken as an advantage
- Be a team player

Your Role:

- Provide support for MicroStrategy's product suite and its underlying technologies.
- Develop relationships with MicroStrategy customers and partners
- Find solutions to problems reported while using MicroStrategy's product suite through analytical troubleshooting abilities.
- Prioritize and communicate product defects and enhancements to development teams.
- Be open to a constant development by participating in Internal Training Programs

MicroStrategy Job will enable you to:

- Gain professional experience in one of the fastest growing BI companies
- Develop your skills and participate in high quality trainings locally in Poland and Worldwide
- Work in international locations; be prepared for traveling and getting to know challenging projects and new people,
- Be creative, ready to participate in projects that feature both IT and Business knowledge
- Work in an international business oriented environment
- Be part of a dynamic, highly energetic and fun team

We offer you an attractive entry level salary and compensation system together with a unique, made to measure 5 weeks training. Real possibilities of professional development are a fact; we have a career path that's tangibly reflecting your achievements and progress.
